

## **OneMed further strengthens its position in the Netherlands with the acquisition of Lensvelt Medical**

Stockholm, April 14, 2016

OneMed Group further expands in the Dutch market with the acquisition of Lensvelt Medical. Last year OneMed entered into the Dutch market through the acquisition of the family-owned company Bosman. The integration has been successful and the acquisition of Lensvelt Medical, with a revenue of MEUR 13 and 40 employees, is a natural step to further strengthen OneMed's position as a leading European distributor of medical supplies and healthcare related services.

### **Acquisition builds on common strengths and complements product offering**

"Lensvelt fits our growth ambitions in the Netherlands and our consolidation strategy for the Group. After a successful integration of Bosman we will now complement our already strong product offering to our customers with a company that share our strong customer focus", says Johan Falk, CEO OneMed Group. "In addition, the acquisition also brings new growth opportunities, for example through cooperation with pharmacies."

The acquisition is pending approval from the Dutch competition authority (ACM) and will be finalized after official approval. The consolidation of Lensvelt into OneMed Group is planned for May 1, 2016.

### **About OneMed**

OneMed is a leading European distributor of medical supplies and healthcare related services. We are active in twelve countries, employ more than 700 FTEs and our annual net sales amounts to EUR 400 million. OneMed partners with our customers to enable better lives for patients – making everyday life easier for medical personnel and reducing healthcare costs. We strive to reduce environmental impact and cooperate with our suppliers to improve working conditions throughout the supply chain.

### **About Lensvelt**

Lensvelt Medical is a specialist in medical devices and distributes products within the areas of diabetes, incontinence, clinical nutrition, wound care and ostomy direct-to-patients, pharmacies, healthcare institutions and home care organizations. Lensvelt has a revenue of EUR 13 million and employs 40 FTEs. Nedpharma - an internationally oriented wholesaler – is included in the acquisition.
